

AMENDED IN SENATE JUNE 20, 2016

CALIFORNIA LEGISLATURE—2015–16 REGULAR SESSION

ASSEMBLY BILL

No. 2317

Introduced by Assembly Member Mullin
(Coauthor: Senator Leyva)

February 18, 2016

An act to add Article 4.6 (commencing with Section 66041) to Chapter 2 of Part 40 of Division 5 of Title 3 of the Education Code, relating to public postsecondary education.

LEGISLATIVE COUNSEL'S DIGEST

AB 2317, as amended, Mullin. California State University: Doctor of Audiology degrees.

Existing law, known as the Donahoe Higher Education Act, sets forth, among other things, the missions and functions of California's public and independent segments of higher education, and their respective institutions of higher education. Provisions of the act do not apply to the University of California unless the regents of the university act, by resolution, to make them applicable.

Among other things, the act provides that the University of California has exclusive jurisdiction in public higher education to award the doctoral degree in all fields of learning, except that it may agree with the California State University to award joint doctoral degrees in selected fields. With respect to doctoral degrees, the act limits the California State University to awarding these degrees jointly with the University of California, as described above, or, with the approval of the California Postsecondary Education Commission, jointly with independent institutions of higher education.

This bill would instead authorize the California State University to award the Doctor of Audiology degree. The bill would require the degree to be distinguished from doctoral degree programs at the University of California. The bill would require that the degree be focused on preparing audiologists to provide health care services and be consistent with the standards for accreditation set forth by the Council on Academic Accreditation in Audiology and Speech-Language Pathology. The bill would require that each student in the programs authorized by the bill be charged fees no higher than the rate charged for students in state-supported programs in audiology at the University of California.

Vote: majority. Appropriation: no. Fiscal committee: yes. State-mandated local program: no.

The people of the State of California do enact as follows:

1 SECTION 1. Article 4.6 (commencing with Section 66041) is
2 added to Chapter 2 of Part 40 of Division 5 of Title 3 of the
3 Education Code, to read:

4
5 Article 4.6. Doctoral Programs in Audiology
6

7 66041. (a) The Legislature finds and declares both of the
8 following:

9 (1) Since its adoption in 1960, the Master Plan for Higher
10 Education has served to create the largest and most distinguished
11 higher education system in the nation. A key component of the
12 Master Plan for Higher Education is the differentiation of mission
13 and function, whereby doctoral and identified professional
14 programs are limited to the University of California, with the
15 provision that the California State University can provide doctoral
16 education in joint doctoral programs with the University of
17 California and independent California colleges and universities.
18 The differentiation of function has allowed California to provide
19 universal access to postsecondary education while preserving
20 quality.

21 (2) Because of the need to prepare and educate increased
22 numbers of audiologists, the State of California is granting the
23 California State University authority to offer the Doctor of
24 Audiology degree as an exception to the differentiation of function
25 in graduate education that assigns sole authority among the

1 California higher education segments to the University of
2 California for awarding doctoral degrees independently. This
3 exception to the Master Plan for Higher Education recognizes the
4 distinctive strengths and respective missions of the California State
5 University and the University of California.

6 (b) Pursuant to subdivision (a), and notwithstanding Section
7 66010.4, in order to meet specific audiology education needs in
8 California, the California State University may award the Doctor
9 of Audiology (Au.D.) degree. The authority to award degrees
10 granted by this article is limited to the discipline of audiology. The
11 ~~Doctor of Audiology~~ *Au.D.* degree offered by the California State
12 University shall be distinguished from doctoral degree programs
13 at the University of California.

14 66041.1. In implementing Section 66041, the California State
15 University shall comply with all of the following requirements:

16 (a) Funding on a per full-time equivalent student (FTES) basis
17 for each new student in these degree programs shall be from within
18 the California State University's enrollment growth levels as agreed
19 to in the annual Budget Act. Enrollments in these programs shall
20 not alter the California State University's ratio of graduate
21 instruction to total enrollment, and shall not diminish enrollment
22 growth in university undergraduate programs. Funding provided
23 from the state for each FTES shall be at the agreed-upon marginal
24 cost calculation that the California State University receives.

25 (b) The Doctor of Audiology (Au.D.) degree offered by the
26 California State University shall be focused on preparing
27 audiologists to provide health care services and shall be consistent
28 with the standards for accreditation set forth by the Council on
29 Academic Accreditation in Audiology and Speech-Language
30 Pathology.

31 (c) Each student in the programs authorized by this article shall
32 be charged fees no higher than the rate charged for students in
33 state-supported doctoral degree programs in audiology at the
34 University of California, including joint Au.D. programs of the
35 California State University and the University of California.

36 (d) The California State University shall provide any startup
37 funding needed for the programs authorized by this article from
38 within existing budgets for academic programs support, without
39 diminishing the quality of program support offered to California
40 State University undergraduate programs. Funding of these

- 1 programs shall not result in reduced undergraduate enrollments at
- 2 the California State University.

O
